

# Build the machine you've dreamed of, today!

AC servo drive  
Sigma Five

You want maximum effect quickly and easily, as does every engineer in the field. And now the  $\Sigma$ - $\nu$  series is here with the practical answer to your dreams!

How many times have you heard people say servos need adjustment to work well? Our new tuning-less function means it works as soon as you hook it up!

And if you want more performance than ever before, the  $\Sigma$ - $\nu$  series advanced autotuning function lets you set up for it rapidly.

Advanced technology makes possible a host of safety standards compliance for the first time in Japan (as of April 2007), compliance with key international standards, a diverse motor line-up, compact size, high speed and simple maintenance: everything you need to answer today's requirements.

International Standards

Safety Standards

Safety Stop-0 (Standard)

RoHS Directive

RoHS Directive Stands for the EU directive on the Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment.

Features

Superlative Performance

Operate your machinery faster and with higher precision than ever!

The  $\Sigma$ -V delivers the highest performance in the industry.

The best amplifier response in the industry slashes settling time

In-house comparison: 1/12th

Outstanding frequency response

1.6 kHz\*

\* Representative value when using a combination of the SGMJV-02ADA servomotor and SGD1V-1R6A SERVOPACK at one time of the load moment of inertia ratio.

● Servo Adjustment Example: When the ball screw slider was run using a combination of the SGMJV-02ADA servomotor and SGD1V-1R6A SERVOPACK.

Settling Time 0 to 4 ms !

Enhanced vibration suppression

Existing functions to minimize vibration have been enhanced, and new ones added, improving tracking and further improving settling time. Vibration and noise during driving have also been cut, along with vibration at machine edges when stopping.

Contributing to machine performance in conjunction with a medium-inertia motor

Small Capacity  
SGMJV Series

Low Heating

Improved motor constants have reduced both losses and heating.

Better Cycle Time

Instantaneous peak torque has been boosted from 300% to 350%, contributing to shorter cycle times

Ease of Use

Moment of inertia ratio has been doubled in the same motor, reducing the moment of inertia ratio and boosting gain for faster settling

Medium Capacity  
SGMGV Series

Compact Design

Smaller package and about 20% lighter, but with the same moment of inertia ratio as the conventional model. A small encoder connector is applied.

Improved Vibration Resistance

New coupling delivers typical 5G vibration resistance

Encoder resolution  
1,048,576 pulses/revolution

# Simple Start-up

Making servo adjustment quick and simple

## Faster setup

SigmaWin+

Setup Wizard  
Simple parameter set-up with wizard-aided input

Wiring Check Function  
The SigmaWin+ wiring check function checks your wiring in a single operation

Trace Function  
Realtime trace of adjustment state means you can check instantly.

USB1.1 Support

● Full of handy functions for start-up and more effective operation!

### ■ Selection

Servomotor capacity selection software

SigmaJunmaSize+

Optimal selection for your application:  
With consideration of moment of inertia, DB resistance, etc.

# Let the $\Sigma$ -V series simplify your life!

New Advanced Autotuning Window

## Simple Tuning

Get up and running quickly after hooking up the motor  
 ● New Tuning-less Function

Even without servo adjustment and with load changes, oscillation- and vibration-free drive is possible up to 20 times the load moment of inertia.  
 Settling time: 100 to 150 ms level

Minimize settling time with less vibration  
 ● New Advanced Autotuning

The reference filter and feedback gain adjustment functions have a new automatic feed forward gain adjustment for optimal adjustment performance. The friction compensation function automatically cancels out the effect of friction on machine characteristics.  
 Settling time: 10 ms level

Fine-tuning is a must  
 ● New "One-parameter" Tuning

Fine-tuning can tweak machine performance to the max.  
 Settling time: 0 to 4 ms level

### Maintenance Faster Troubleshooting

Engineering tool  
 SigmaWin+

Alarm diagnostic function:  
 Presumes possible causes of the alarm and immediately displays suggested corrective actions.

# Outstanding Expandability

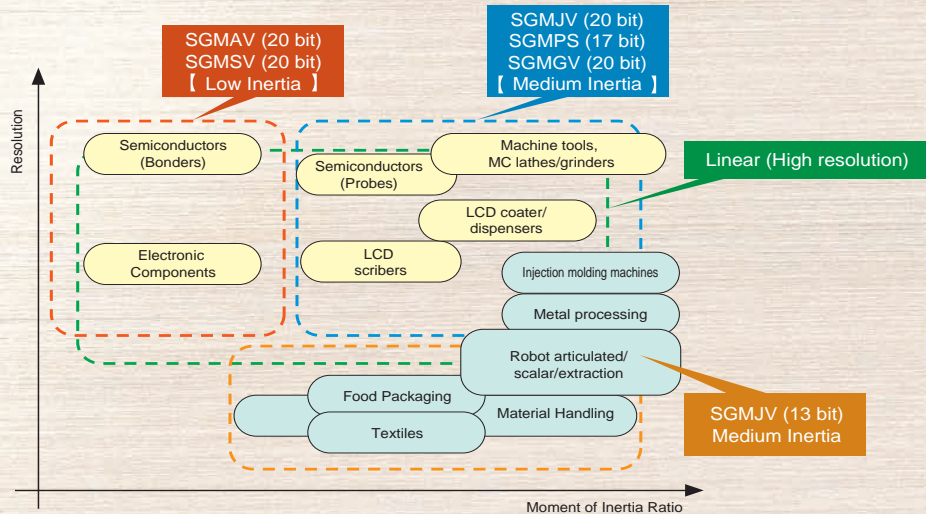

Use servos that really fit into your system

A rich selection of models and options to match your requirements

- Extensive variety of motors to match any machine
  - Medium-inertia servomotors → Improved control stability
  - Low-inertia servomotors → High-speed acceleration and deceleration
- Selection of servo actuators
  - Support for direct drive servomotors, linear servomotors and linear sliders
- Standard support for analog voltage/pulse train reference series or MECHATROLINK-II communications reference series
- Wide selection of option modules for various communication interfaces and feedback
- Compliant with applicable safety standards
  - Easy compliance with machine safety standards
- Motor line-up to handle a wide range of markets and applications

**The first in the industry in Japan!**  
(as of April 2007)

## Product Line-up

### Servomotors

#### ◆Rotary Servomotors (Small Capacity)

SGMMV: 3.3 W to 30 W  
(Low Inertia, Small Capacity)

SGMJV: 50 W to 750 W  
(Medium Inertia, Small Capacity)

SGMAV: 50 W to 1 kW  
(Low Inertia, Small Capacity)

#### ◆Rotary Servomotors (Medium Capacity)

SGMGV: 300 W to 15 kW  
(Medium Inertia, Medium Capacity)

SGMSV: 1.0 kW to 7.0 kW  
(Low Inertia, Medium Capacity)

#### ◆Direct Drive Servomotors

SGMCS: 2 to 3.5 Nm  
(Small Capacity)

SGMCS: 45 to 200 Nm  
(Medium Capacity)

#### ◆Linear Servomotors

##### Linear $\Sigma$ Series

SGLGW (Coreless Type)  
12.5 to 750 N

SGLFW (With F-type Iron Core)  
25 to 1120 N

SGLTW (With T-type Iron Core)  
130 to 1300 N

#### ◆Linear Slides $\Sigma$ -Trac Series

SGT1F ( $\Sigma$ -Trac)  
47 to 560 N

### SERVOPACKs with AC Power Input

#### ◆ Analog Voltage/Pulse Train Reference

SGDV-000001/05

#### ◆ MECHATROLINK-II Reference

SGDV-000011/15

#### ◆ MECHATROLINK-III Reference

SGDV-000021/25

#### ◆ Command Option Attachable Type

SGDV with Additional Options

Available Option Modules include:

- EtherCAT (CoE) Communication
- Fully Closed Loop Control
- MP2600iec Single Axis Controller
- Functional Safety
- Indexer

### SERVOPACKs with DC Power Input

#### ◆ Analog Voltage Reference

SGDV-0000ES1

#### ◆ Pulse Train Reference

SGDV-0000EP1

#### ◆ MECHATROLINK-II Reference

SGDV-0000E11

#### ◆ MECHATROLINK-III Reference

SGDV-0000E21
